CAM-VW14-AD

**Reverse Camera OBD coder for select Volkswagen vehicles
with MIB3 systems**

www.c2vision-eu.com

ABOUT THIS PRODUCT...

CAM-VW14-AD

The CAM-VW14-AD is a rear-view camera coder and add on lead for use with various Volkswagen vehicles featuring MIB3 (Composition Media, Discover Media, Discover Pro) systems. NTSC cameras only. (For specific models please view vehicle applications). The system uses an OBD Dongle for rear camera activation with video input. This allows the camera to be viewed automatically via reverse gear or manually through the vehicles on board controls.

Note: the coder can only be used in one vehicle, after which, use in other vehicles is blocked. Compatible with NTSC video sources only.

APPLICATION LIST

Volkswagen Passat 2019> Volkswagen Tiguan 2020>

Volkswagen Transporter (T6.1) 2019>

PRIOR TO INSTALLATION

Read the manual prior to installation. Technical knowledge is necessary for installation. The place of installation must be free of moisture and away from heat sources. Please ensure you use the correct tools to avoid damage to the vehicle or product.

Connects2 can not be held responsible for the installation of this product.

TECHNICAL SUPPORT

DISCLAIMER

The information provided in this document is subject to change without notice due to manufacturer changes and/or improvements to the product/s. This instruction manual is based on documented data and research. The manufacturer of this product cannot be held responsible for any changes made to the vehicle by the manufacturer or damages that may occur through the installation of this product in accordance with the steps outlined herein.

INSTALLATION

Connecting Aftermarket Reverse Camera

1. Connect the video RCA of the after-market rear-view camera to the female RCA connector of the supplied cable.
2. Connect the two pin connectors from the camera lead to the appropriate pin placements within the Fakra housing.

Coding Aftermarket Reverse Camera

1. Locate OBD-port and remove cover
2. Turn on ignition
3. Wait until the head-unit has fully loaded
4. Plug coder into the vehicles OBD-port
5. Leave coder in the OBD-port for around 30 seconds (*see "LED Status"*)
6. Remove coder from the OBD-port

To reverse the coding repeat steps 1-6

After this first use on a vehicle, the coder CAM-VW14-AD is personalised to this vehicle and can be used unlimited times to code or reverse coding on this vehicle.

LED Status Information

When plugged into the OBD port, the CAM-VW14-AD will automatically go to work coding the vehicle. The status of the OBD coder's LED will identify the following:

LED	Status	Explanation
Green	Light	Coding procedure successfully completed
Green	Flashing	Coding process running
Red	Light	Remove coding procedure successfully completed
Red	Flashing	Coding process failed/license violation
Green + Red	Light	CAN communication error - Abort of the diagnostic session
